- 1. Order types.
- 2. Order quantity.
- 3. Order price.
- 4. Market order.
- 5. Order ticket.
- 6. Scroll through prices.

Place an Order

- 1. Make sure Chart Trading is enabled.
- 2. Click the bid or offer column to open the prompt for buy or sell orders, respectively.
- 3. Choose the order type (Trailing, Stop, Stop Limit, etc.), or leave all order types unselected for a limit order. Note that choosing to place a Market order will execute the selected quantity immediately.
- 4. Check that the order quantity is correct and make any changes if necessary.
- 5. Click the desired price to enter the order. Note that clicking MKT will enter a market order.
- 6. Use the up/down arrows the scroll through different prices.
- 7. Alternately, click TKT to open a classic ticket for order entry.

Revise/Cancel an Order

- 1. Click the blue/red dot to open the order entry prompt.
- 2. Modify the quantity if necessary and click the new price to revise the order.
- 3. Alternately, click and drag the blue/red dot to modify the price of an order.
- 4. Click the red circled "X" in the order entry prompt or in the order details to cancel that order only.
- 5. Click the red circled "X" at the top of the chart to cancel all orders in the selected month.

Properties

- 1. Click the properties button in the upper left of the chart window.
- 2. Select the "Account" tab.
- 3. Select how orders, order details, fills, and position information are displayed in the chart.
